ABSTRACT

A profile of the fall 1979 first-time freshmen at the City University of New York (CUNY) is presented and comparisons are made with the fall 1975 and 1976 classes. In fall 1976, tuition was imposed for the first time and new admissions criteria were set. In comparison to fall 1976 enrollments, the number of first-time freshmen enrollment at CUNY in fall 1979 increased 12 percent overall, 20 percent at the senior colleges and seven percent at the community colleges. At the senior colleges, freshman enrollment is still 37 percent below the fall 1975 pretuition and preadmission criteria level, but at the community colleges, freshman enrollment is at the 1975 level. Information is provided for the specific colleges. At the senior colleges, 79 percent of the regular freshmen meet the admission criteria, while the community colleges have no high school grade point average cutoff level required for admission. Information is provided on freshman enrollment in two programs--SEEK and College Discovery (CD)--which are designed to help economically, educationally, and socially disadvantaged students. At CUNY, 99 percent of the SEEK/CD freshmen, 91 percent of the regular senior college freshmen, and 82 percent of the regular community college freshmen are full-time students. The average full-time freshman is enrolled for 14-15 credits and/or equated credits. The average part-time freshman is enrolled for seven credits and/or equated credits, including one compensatory/remedial hour at senior colleges and three compensatory/remedial hours at community colleges. The number of freshman applicants to CUNY senior has declined by 15 percent since 1976, while the number applying to CUNY community colleges has increased by 12 percent. (SW)

Appendix

A, B: Percentage Distribution of First-time Freshmen by High School Rank and College Admissions Average: Fall 1979 Regular Program Freshman
A: Senior Colleges
B: Community Colleges

C: CUNY Applicants and Enrollees by High School: Fall 1979

This report presents a profile of the first-time freshman class at The City University of New York in the Fall 1979[1]. Comparisons are made with the first-time freshman classes of Fall 1975, the last pre-tuition year, and Fall 1976, a year of considerable change. In Fall 1976, tuition was imposed on students for the first time in the history of the University. In addition, new admissions criteria were set, requiring a college admissions average (CAA[2]) of at least 80 or a high school percentile rank of at least 66%, for all regular (i.e., non-SEEK) students admitted to the senior colleges[3]. These and other factors led to significant declines in the numbers of applicants and enrollees that year.

---

[1]Enrollment data are taken from the CUNY Data Books. Course enrollment information on the Fall 1979 freshmen was collected on Show-Registration tapes routinely submitted by the colleges of CUNY to the Office of Institutional Research and Analysis. Application data were provided by the University Applications Processing Center (UAPC). Only students identified as first-time freshmen admitted into a program leading to a degree or certificate are included here; non-degree students are excluded. UAPC and "direct" admits (who apply directly to the college) are included. Medgar Evers College is included here in the Community College summaries in all three years. The data reported here differ slightly from those reported in Application and Enrollment of CUNY Freshmen: Fall 1975 vs. Fall 1976, New York: CUNY 1977. The 1977 report was based on preliminary data available prior to the Data Book.

[2]CAA is the average of grades earned in high school academic courses.

[3]In the Fall 1979, the College of Staten Island began to admit freshmen into Baccalaureate degree programs as well as into Associate degree and Diploma programs. The freshmen enrolled in the Baccalaureate degree programs are included here with the senior colleges. All others are included with the community colleges.

ENROLLMENT: Fall 1975 & 1976 vs. Fall 1979

The number of first-time freshmen enrolled at CUNY in Fall 1979 has increased 12% overall, 20% at the senior colleges and 7% at the community colleges, compared to Fall 1976. At the senior colleges freshman enrollment is still 37% below the Fall 1975 pre-tuition, pre-admission-criteria level, but at the community colleges, freshman enrollment is at the 1975 level (Tables 1, 2, 3).

The freshman classes at LaGuardia, Baruch, John Jay, and York have increased at least 48% since 1976. At Bronx, Evers, Lehman, City, and Manhattan, the freshman classes are smaller than they were in 1976 (Table 4).

At Hostos, Staten Island, Brooklyn, and Bronx, at least 20% of the first-time freshmen are "direct" admits[4]. Overall 9% of the freshmen are "direct" admits, compared to 7% in 1975 and 5% in 1976.

Women represent 57% of the freshman class, continuing a trend of increasing female representation among new enrollees.

---

[4]Traditionally, "direct" admits are students whose applications are processed by a college's admissions office rather than by the University Applications Processing Center. Often though, even the applications of these direct admits are processed subsequently by UAPC. The direct admits included here are students whose applications either were never processed by UAPC or were processed with a different social security number and thus did not match the file of freshman enrollees. For these "direct" admits, background data such as high school percentile rank and CAA were not available for this report.

At the senior colleges 79% of the regular freshmen meet the CAA/High School percentile rank admission criteria[5], ranging from 55% at John Jay and 58% at York to 93% at the College of Staten Island and 90% at Baruch (Table 5).

An additional 14.5% of the regular freshmen are either missing CAA and have a High School percentile rank below the required level, or are missing percentile rank and have a CAA below the required level. It is possible that the missing CAA or percentile rank is above the required level. A comparison of remedial coursework required of regular senior college freshmen missing CAA and of those with a recorded CAA indicates that the freshmen missing CAA most closely resemble the group with a CAA 80 and above (Table 14), thus supporting the hypothesis that the group missing CAA would have fallen into the category of acceptable admission criteria.

For freshmen not meeting the CAA percentile rank admission criteria, several alternate criteria for admission can be suggested: applicants who have a combined SAT score of at least 900 may be admitted without the required CAA and percentile

---

[5]In Fall 1979 at all senior colleges except John Jay and York, a CAA of 80 or above or a High School percentile rank of at least 66 is required for regular program admission. At John Jay, a CAA of 75 or above or a HS percentile rank of at least 66 is required. At the College of Staten Island, the admission criteria refer only to freshmen applying to baccalaureate degree programs.

rank; applicants accepted to SEEK but later ruled ineligible for the program are often retained as regular students by the colleges; rejected applicants sometimes appeal to and are accepted by a college administrative committee based on skills assessment test results and high school record; at John Jay, freshmen in special satellite programs are allowed to enroll even if they don't meet the criteria.

For all senior college freshmen with a reported CAA, the greatest increase was among those with a CAA between 75 and 79 (Table 2). This can be attributed to the increase in SEEK freshmen at this level (to be discussed later) and to those with a high school percentile rank of at least 66 but with a CAA less than 80. At the same time, more than two-thirds of the regular senior college freshmen had a CAA of 80 and above (Table 11).

At the community colleges where there is no CAA cutoff level required for admission, and more students come from non-traditional high school backgrounds (e.g., GED, modified programs), 23% of the freshmen are missing CAA[6], up from 7% missing in 1976. Of those recorded, the higher CAAs showed the greater decreases in enrollment.

---

[6]Of these 23% missing, 12% fall into the "inapplicable" category, and 11% are actually missing (i.e., data, if recorded on transcript, were not transmitted to UAPC).

Three quarters of the senior college freshmen enrolled in college directly after high school, compared to only half (52%) of the community college freshmen (Tables 7 and 8). GED recipients account for 7% of the senior college freshmen and 13% of the community college freshmen.

A related finding is that senior college freshmen, as a group, are younger than community college freshmen: 62% of the senior college freshmen but only 38% of the community college freshmen are 18 or younger (Table 9).

At community colleges where students are required to declare their degree program upon admission, more than two-thirds are in career programs; a majority of these are in Business. College Discovery freshmen tend more towards career programs than do regular freshmen (Table 10). Liberal Arts was among the top two majors at all community colleges except Bronx and New York City. Business was among the top two majors at all community colleges except Hostos. Health Services ranked high at Bronx, Hostos and Manhattan. Engineering and Science Technology ranked high at New York City.

SPECIAL PROGRAM FRESHMEN: SEEK AND COLLEGE DISCOVERY (CD)[7]

There has been a 57% increase in SEEK freshman enrollment and a 36% increase in CD freshman enrollment, compared to Fall 1976. SEEK freshmen represent 25% of the senior college freshmen, while CD freshmen represent 10% of the community college freshmen (Table 11 and 12). Since the total number of SEEK and CD students enrolled in CUNY is constant and mandated by the State, the increased freshman SEEK/CD enrollment suggests a higher graduation/attrition rate among SEEK/CD students enrolled prior to Fall 1979.

Special program freshmen account for 47% of the first-time freshmen at Lehman and for 30% or more of the first-time freshmen at City, Hunter, York, and Medgar Evers Colleges (Tables 5 and 6).

Women represent a larger proportion of the special program freshmen than they do of the regular program freshmen (Tables 11 and 12).

As a result of a change in SEEK/CD eligibility requirements that took effect in 1978, special program freshmen have higher

---

[7] SEEK, at the senior colleges, and College Discovery (CD) at the community colleges are programs designed to help economically, educationally and socially disadvantaged students successfully complete their education at CUNY. These programs provide the students with academic and extra-curricular support services as well as financial grants based on individual need.

CAAs in 1979 than they did in 1976. (The 1976-1977 requirement was for a CAA under 75. The requirement beginning in 1978 was for a CAA under 80, a return to the pre-1976 standard). Only 6% of the SEEK freshmen had a CAA 75 or above in 1976 compared to 34% in 1979. Only 7% of the CD freshmen had a CAA 75 or above in 1976 compared to 26% in 1979. The same upward trend occurs in high school percentile rank. (By contrast, regular program freshmen show a decrease in CAA level and high school percentile rank from 1976 to 1979).

SEEK and CD freshmen are more likely to enroll directly after high school than regular program freshmen (Tables 7 and 8). However, whereas SEEK freshmen are slightly older than regular senior college freshmen, CD freshmen are younger than regular community college freshmen (Table 9). This is because regular community college freshmen comprise the oldest of the freshman groups.

A greater proportion of special program freshmen who have delayed college attendance are GED recipients.

COURSE LOAD

At all New York State colleges, twelve credits and/or equated credits[8] (i.e. compensatory or remedial hours) are required

[8]Remedial courses include compensatory and developmental courses which offer credits and equated credits, and noncredit remedial courses which offer equated credits only. These equated credits count towards full-time status and TAP eligibility (according to criteria established by the State Education Department), but not towards credits required for the degree.

for full-time status and also for the New York State Tuition Assistance Program (TAP) eligibility. At CUNY, 99% of the SEEK/CD freshmen, 91% of the regular senior college freshmen, and 82% of the regular community college freshmen are full-time (Table 13).

The average full-time freshman is enrolled for 14-15 credits and/or equated credits (2-3 credits and/or equated credits above the required full-time level). The number of actual credits, though, differs depending on program and college level: The average regular senior college freshman is enrolled for 12 credits and 2.5 compensatory/ remedial hours (equated credits) and would be full-time even if one disregarded the equated credits in remedial courses. The average regular community college freshman is enrolled for 9 credits and 6 compensatory/remedial hours. The average SEEK/CD freshman is enrolled for 8-9 credits and 8 compensatory/remedial hours. Thus, about half of the SEEK/CD freshman's program is in non-credited remedial coursework compared to only 17% of the regular senior college freshman's and 39% of the regular community college freshman's. This higher remedial load can be expected to lengthen the amount of time a SEEK/CD freshman will need to complete the credits required for graduation.

The average regular part-time freshman is enrolled for 7 credits and/or equated credits, including 1 compensatory/remedial hour at senior colleges and 3 compensatory/remedial

hours at community colleges. The average part time freshman, then, is at least a half-time student.

Among regular program freshmen, remedial course enrollment is related to CAA. Half of the freshmen with a CAA of 80 or above take no remedial courses compared to about 30% of those with a CAA below 80 taking no remedial courses. For all students, the skills assessment program instituted in Fall 1979 may have led to increased enrollment in remedial programs. At senior colleges, 66% of the freshmen are enrolled in at least one remedial course compared to about 68% in 1976. At community colleges, 79% of the freshmen are enrolled in at least one remedial course compared to about 72% in 1976. More than 90% of the special program freshmen enroll in at least one remedial course, regardless of CAA.

CD freshmen generally enroll in 1 or 2 remedial courses. SEEK freshmen generally enroll in 3 or more remedial courses. Controlling for CAA, regular senior college freshmen take fewer remedial courses than regular community college freshmen.

APPLICANTS: Fall 1975 & 1976 vs. Fall 1979

The number of freshman applicants to CUNY senior colleges has declined by 15% since 1976 (compared to a 20% increase in enrollees), while the number applying to CUNY community colleges has increased by 12% (compared to a 7% increase in enrollees).

Although there were more senior college applicants than community college applicants, there are more community college freshman enrollees than senior college freshman enrollees. This can be explained in terms of allocation and rate of enrollment. More students applied to senior colleges but more were allocated to community colleges. Also, those who applied and/or were allocated to senior colleges were less likely to enroll than those allocated to community colleges (Table 17).

New York City public high school graduates account for 60% of all applicants (Appendix C). The proportion of these high school graduates with a high CAA has been declining for the past several years, partially explaining the lower CAA distribution among CUNY applicants (Table 15). (It should be noted that the proportion of New York City public high school graduates with a CAA 90 and above who apply to CUNY is greater now than it was in 1976, even though the actual numbers are smaller).

Overall, the percentage of applicants who enrolled[9] in 1979 (58%) is higher than it was in 1976 (52%), and the same as in 1975. At each CAA level, students enrolled more often in 1979 than in 1976 (Table 16). However, those with a CAA of 80 or above continue to enroll less often than those with lower CAAs.

Many more applicants in 1979 were eligible for a special program. Of all eligible students, 87% were allocated to a special program in 1979, compared to 37% in 1975 and 91% in 1976.

Applicants who were eligible for a special program enrolled more often (66%) than those who were not eligible (56%). This was true regardless of whether or not they were allocated to a special program, a marked change from past years. (One reason for the increased enrollment rate of applicants eligible for but not allocated to a special program may be an increased awareness among applicants of sources of financial aid available, apart from the SEEK/CD programs.)

Many more applicants were allocated to their first choice college in 1979 (81%) than in 1975 (72%) or in 1976 (62%). Possible explanations of this increase may be that special program applicants, now a larger portion of the applicant pool,

[9]Applicants in 1979 who enrolled as nondegree students, and "direct" admits, are not included in these enrollment figures.

are no longer allocated through a lottery but by their choice of college. Also, now that the admissions criteria have been in place for four years, applicants are more aware of them and are applying more often to colleges where they meet the criteria. Of those allocated to their first choice college, 60% enrolled in 1979 compared to 54% in 1976. Of those not allocated to their first choice college, 52% enrolled in 1979 compared to 47% in 1976.

Students applying and allocated to community colleges enrolled more often than those applying to and allocated to senior colleges. Of all applicants allocated to a CUNY college, 55% enrolled at their allocation college and another 3% enrolled at a different CUNY college (Table 17).

%	7.1%	5.4%	9.2%		

[1]Hostos 1979 figures are based on preliminary data.

[2]All 1979 freshmen at Staten Island are included here regardless of program.

[3] Traditionally, "direct" admits are freshmen whose applications are processed by a college's admissions office rather than by the University Applications Processing Center. Often, though, even the applications of these direct admits are processed subsequently by UAPC. The direct admits included here are freshmen whose applications either were never processed by UAPC or were processed with a different social security number and thus did not match the file of freshman enrollees.

TABLE 5

Distribution of Senior College Freshmen by College Admissions Average/Percentile Rank Admission Criteria: Fall 1979

College	Total N	Regular Freshmen: Total Regular	Regular Freshmen: % Meeting CAA/%ile Admission Criteria[1]	Regular Freshmen: % Missing CAA or %ile[2]	Regular Freshmen: % Admitted on Alternate Criteria[3]	SEEK: Total SEEK	SEEK: % of Total N
Baruch	2,202	1,617	90.1	3.8	6.1	585	26.6
Brooklyn	2,498	2,066	75.8	19.0	5.2	432	17.3
City	1,696	1,093	81.6	12.0	6.4	603	35.6
Hunter	1,800	1,247	88.0	6.0	6.0	553	30.7
John Jay	1,108	931	54.6	29.1	16.3	177	16.0
Lehman	894	476	64.3	26.9	8.8	418	46.8
Queens	2,230	1,907	85.7	10.7	3.6	323	14.5
Staten Island	127	121	92.6	7.4	0.0	6	0.8
York	606	418	57.6	38.8	3.6	188	31.0
TOTAL SC	13,161	9,876	79.1	14.5	6.4	3,285	25.0

[1] In Fall 1979 at all senior colleges except John Jay and York, a CAA of 80 or above or a High School percentile rank of at least 66 is required for regular program admission. At John Jay, a CAA of 75 or above or a HS percentile rank of at least 46 is required. At York, a CAA of 75 or above or a HS percentile rank of at least 66 is required. At College of Staten Island the admission criteria refer only to freshmen applying to Baccalaureate degree programs.

[2] These freshmen are either missing CAA and have a High School percentile rank below the required level, or are missing percentile rank and have a CAA below the required level. It is possible that the missing CAAs or percentile ranks are above the required level, and if they had been coded, the freshmen would have been included in the column of Freshmen Meeting CAA/%ile Admission Criteria. Thus, some of the 14.5% total here might have been included with the 79.1% total of the regular senior college freshmen meeting the CAA/%ile admissions criteria; others might have been admitted based on alternate criteria (see footnote 3).

[3] These freshmen have a CAA and High School percentile rank below the required level but are accepted on the basis of SAT scores; prior SEEK acceptance; special college administrative action; or a special program such as the satellite program at John Jay.
